

DSP Midterm, Group 03

Speech and silence segmentation

Võ Thanh Quân: Binary Search

Vương Quốc Trung: Histogram

Đình Huỳnh Nguyên Khang: Statistics

Shared experiment settings

4 TRAIN WAVs. 4 separate TEST WAVs.

25 ms windows centered on 10 ms decisions.

Normalize STE separately for each WAV.

Merge all silence shorter than 200 ms.

Red: LAB. Blue: predicted boundaries.

F0 is shown as an independent estimate.

Binary Search

Võ Thanh Quân

TRAIN

Normalize STE
Apply median

LAB frame labels
Keep overlap

Bisect threshold
Score TRAIN

Median = 15. Shared T = 0.0016054242.

TEST

Same TEST features
Median = 15

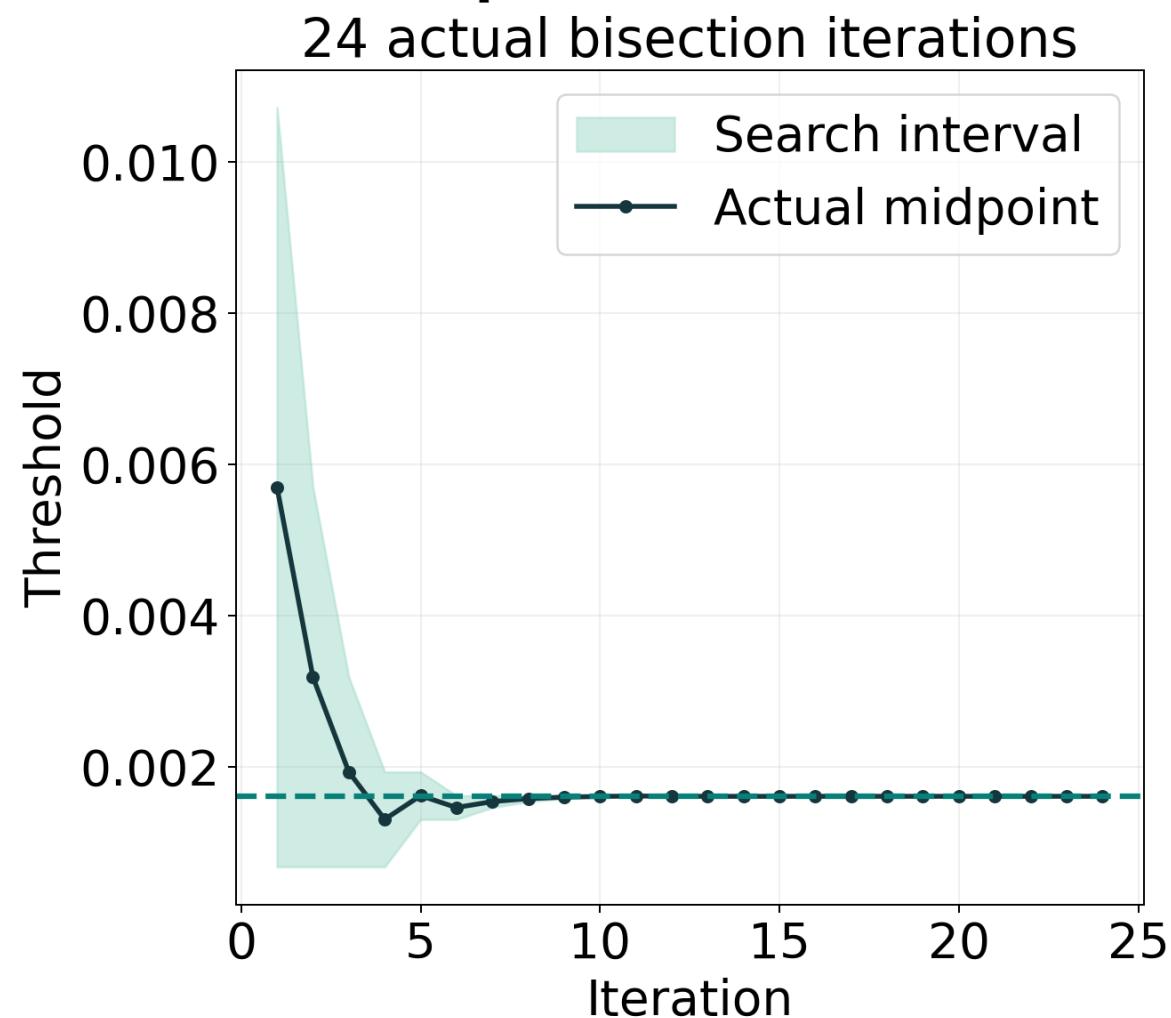

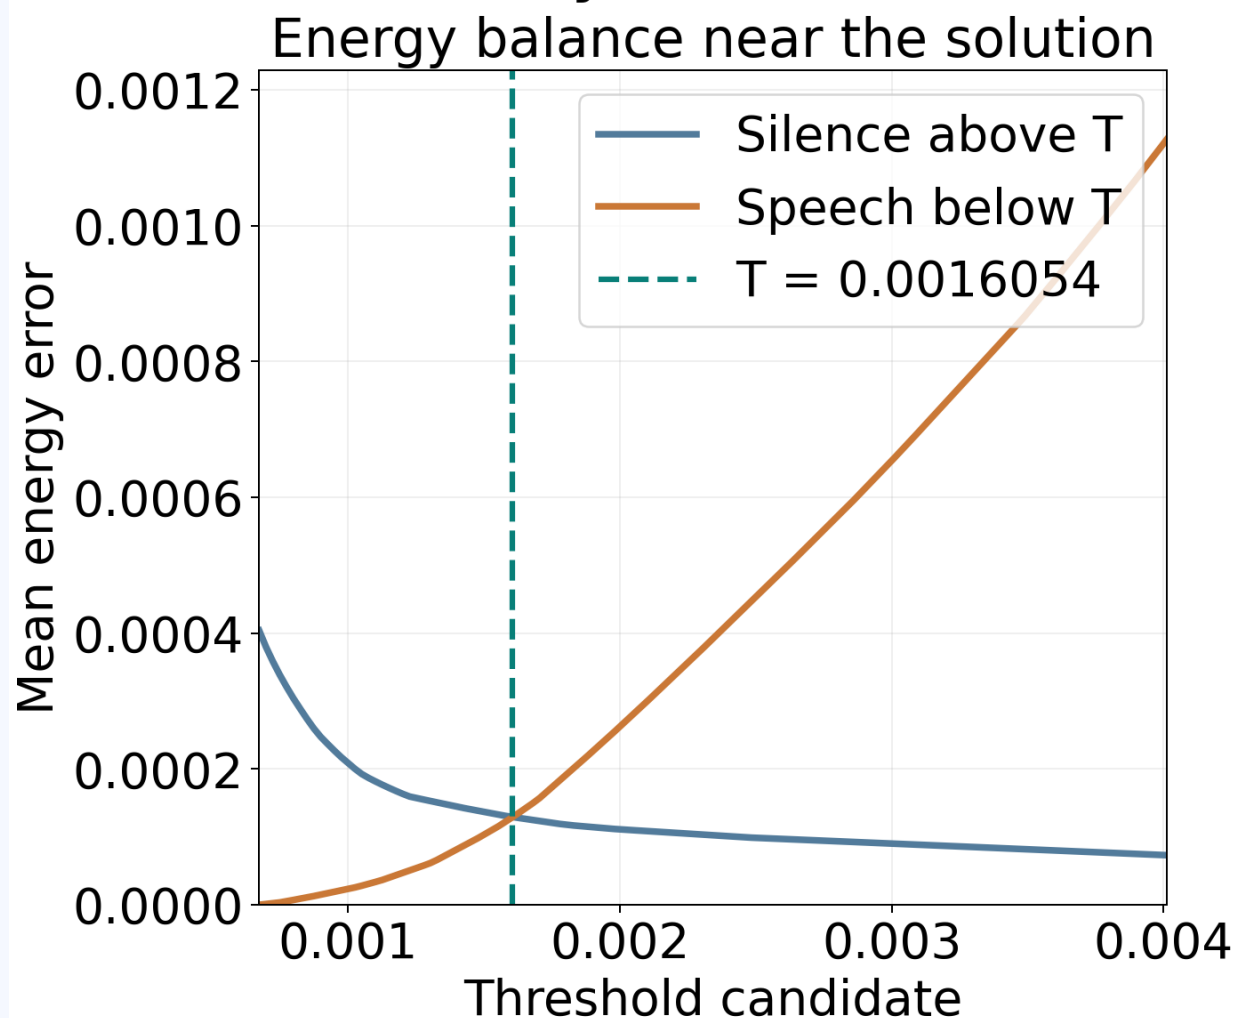

Fixed threshold
Speech or silence

Fill short silence
Under 200 ms

Binary Search: finding the balance

TRAIN overlap. 24 actual bisection iterations.

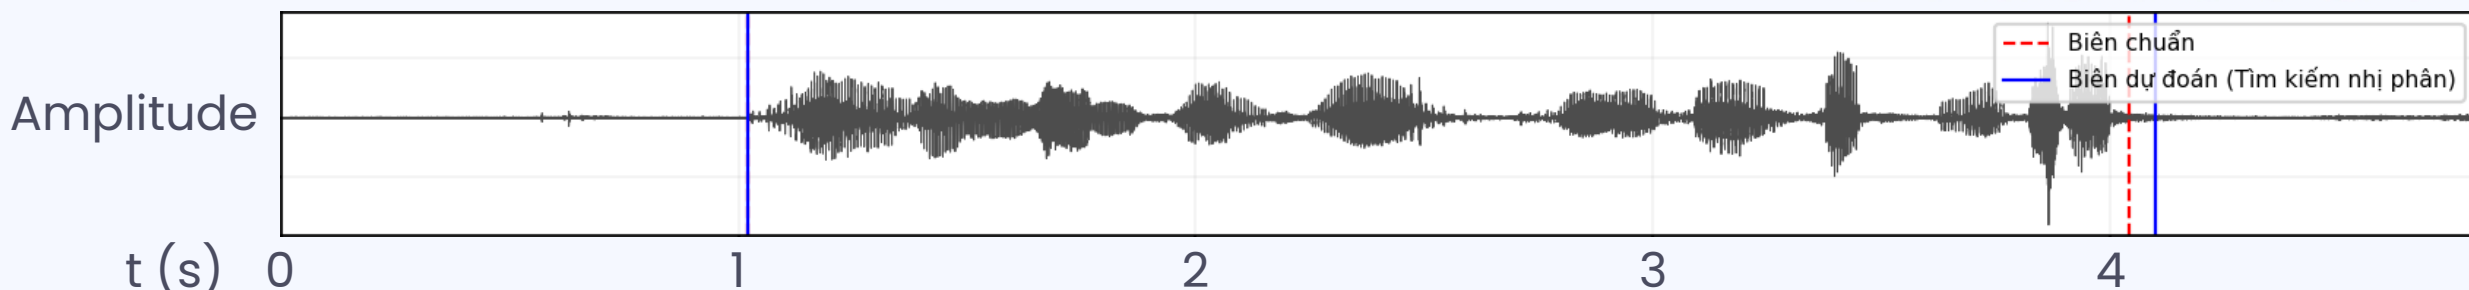

Binary Search on TRAIN: median 15, overlap 118/108

Binary Search: phone_F2

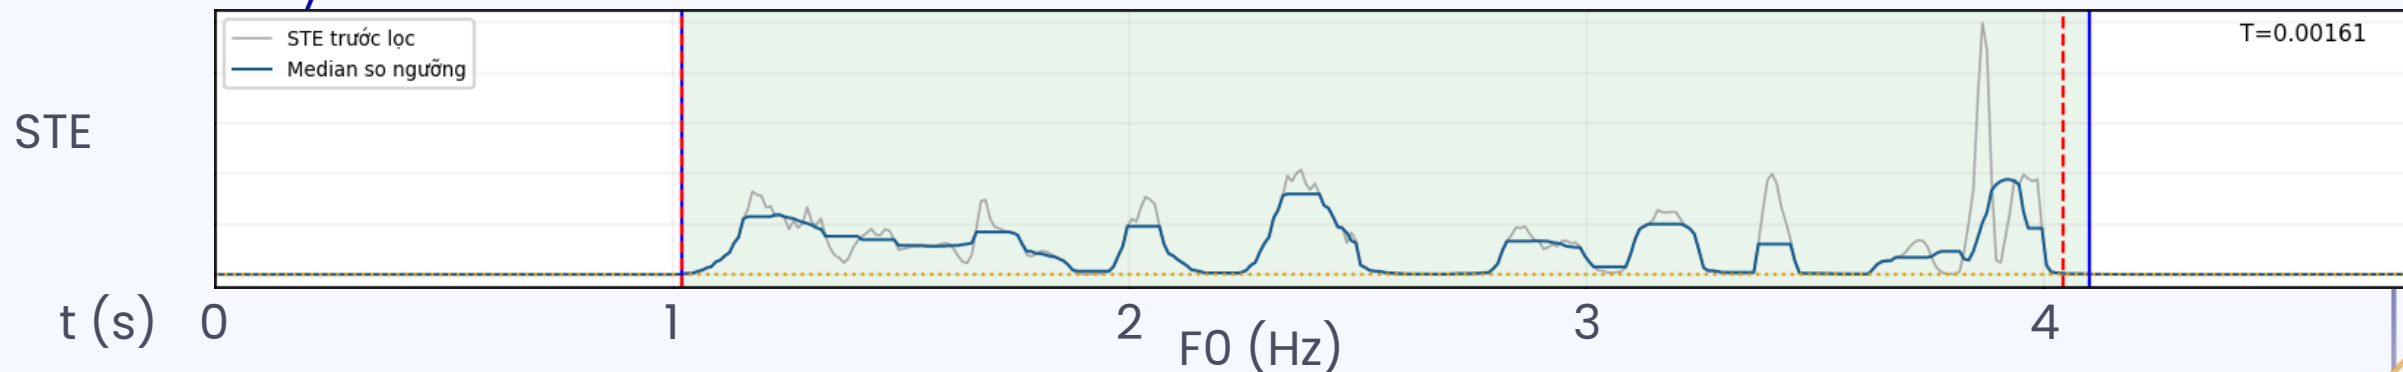

MAE 30 ms

Start matches. End 60 ms late.

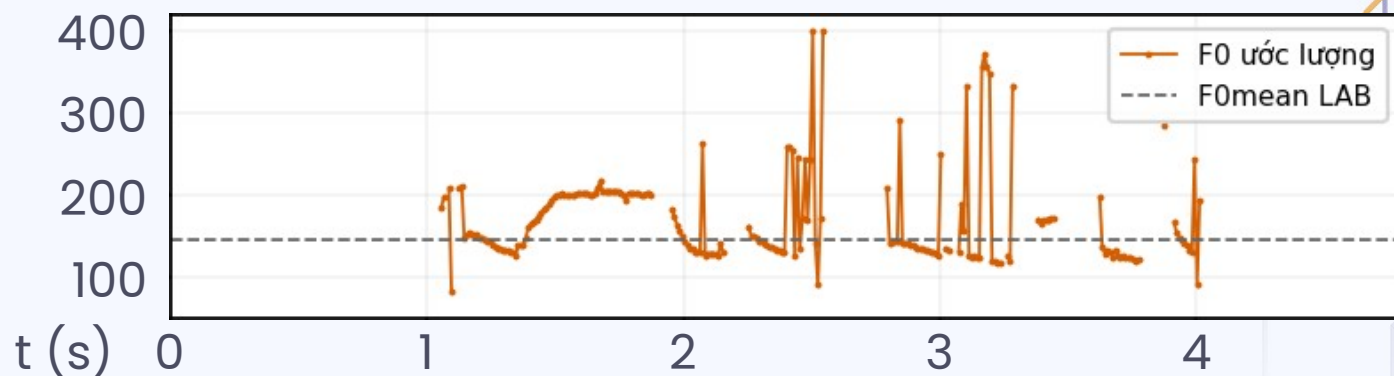

Grey: raw STE. Blue: median STE.

$T = 0.0016054242$

Tail median STE remains above the fixed threshold

Extra: 0. Missed: 0.

Binary Search: phone_M2

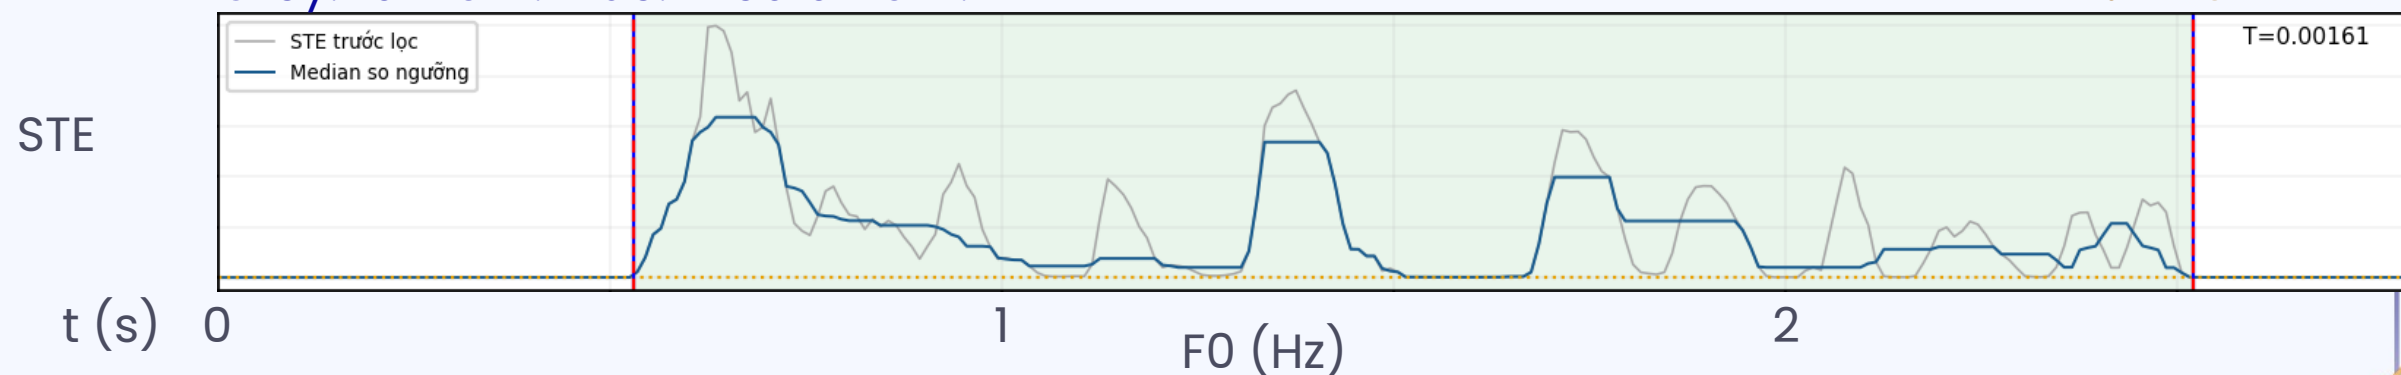

MAE 0 ms

Start matches. End matches.

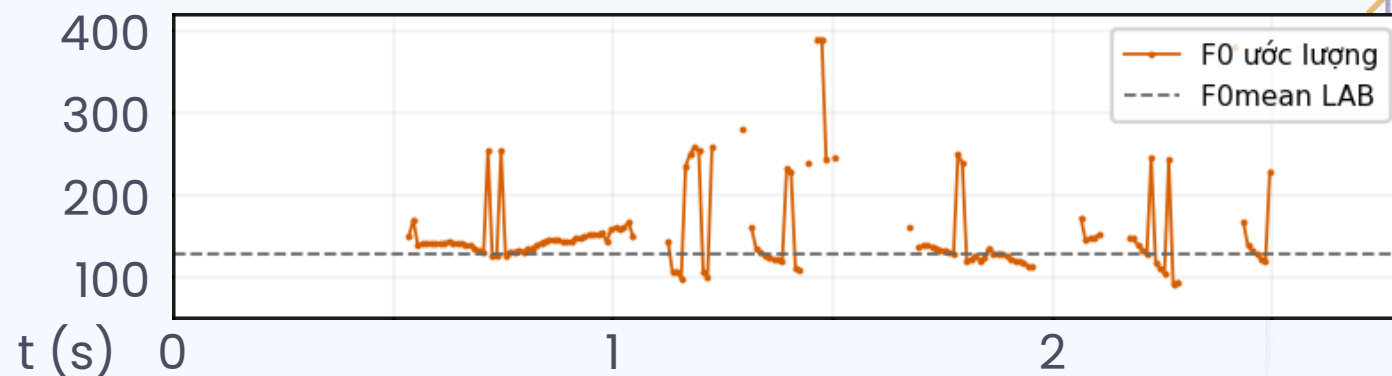

Grey: raw STE. Blue: median STE.

T = 0.0016054242

**Both LAB timestamps match
the detected transitions**

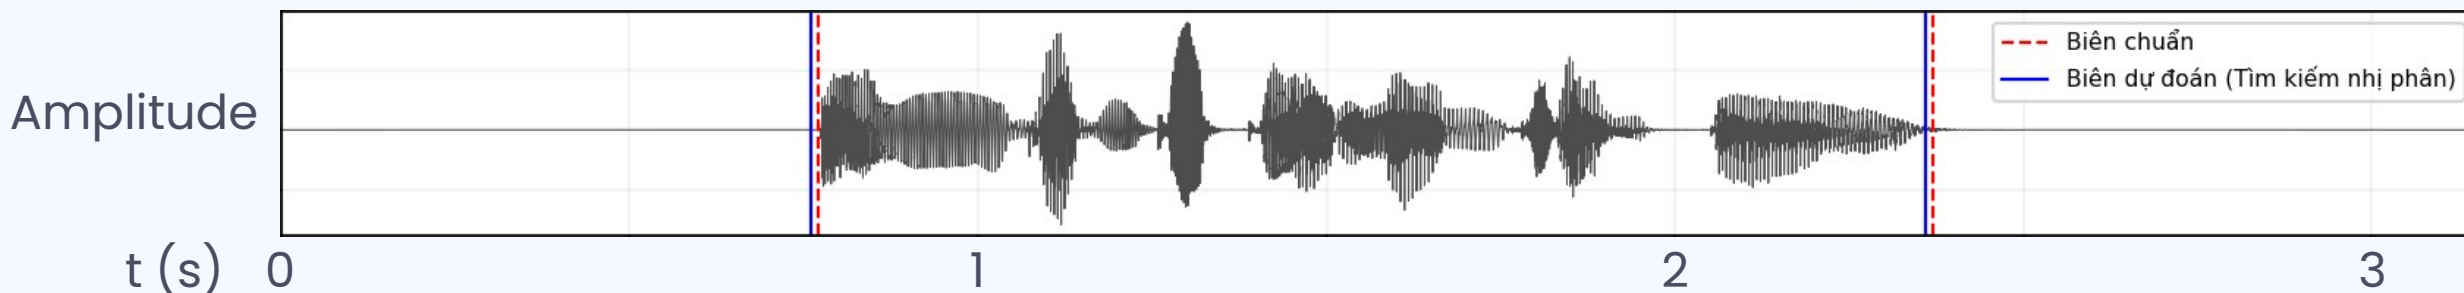

Extra: 0. Missed: 0.

Binary Search: studio_F2

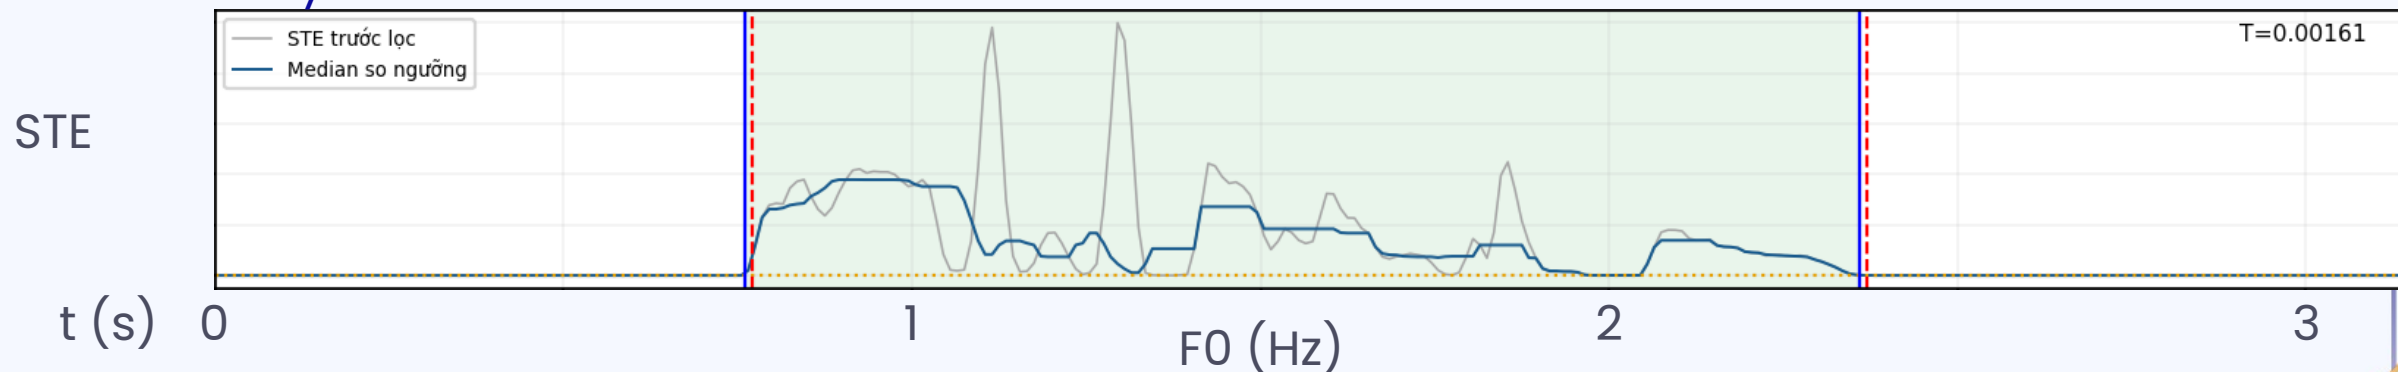

MAE 10 ms

Start 10 ms early. End 10 ms early.

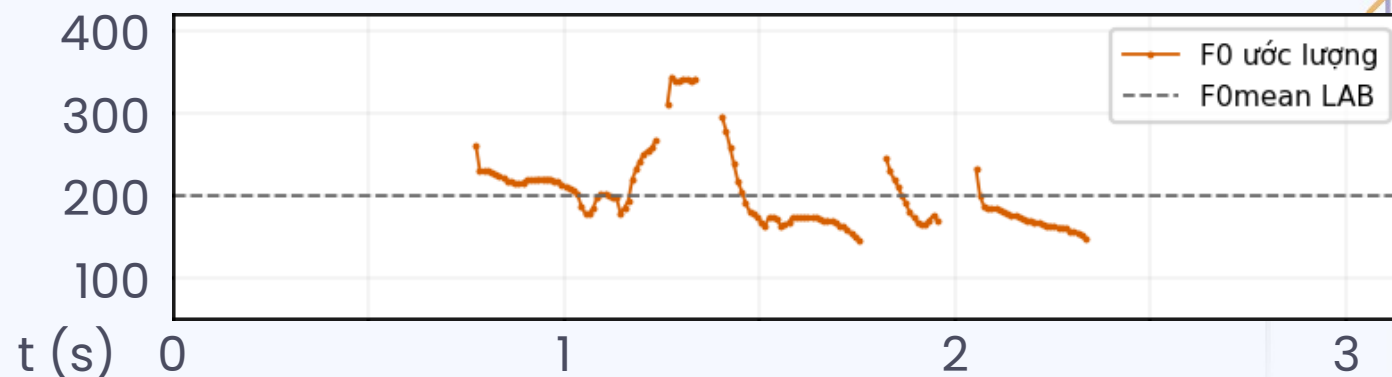

Grey: raw STE. Blue: median STE.

$T = 0.0016054242$

Energy crosses T before
the LAB transitions

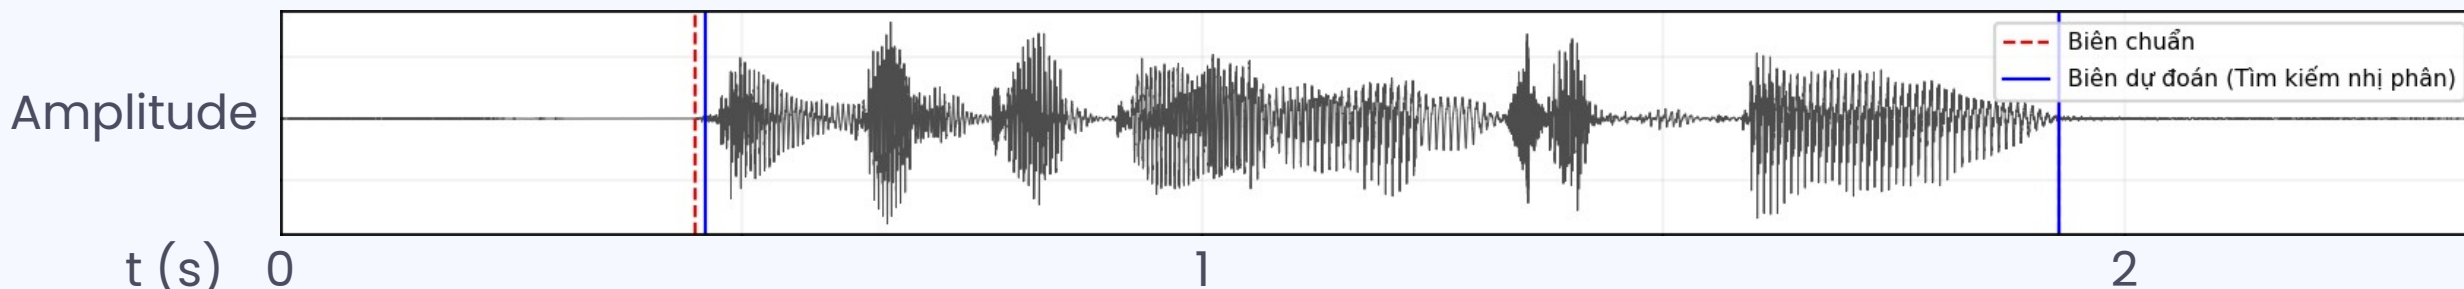

Extra: 0. Missed: 0.

Binary Search: studio_M2

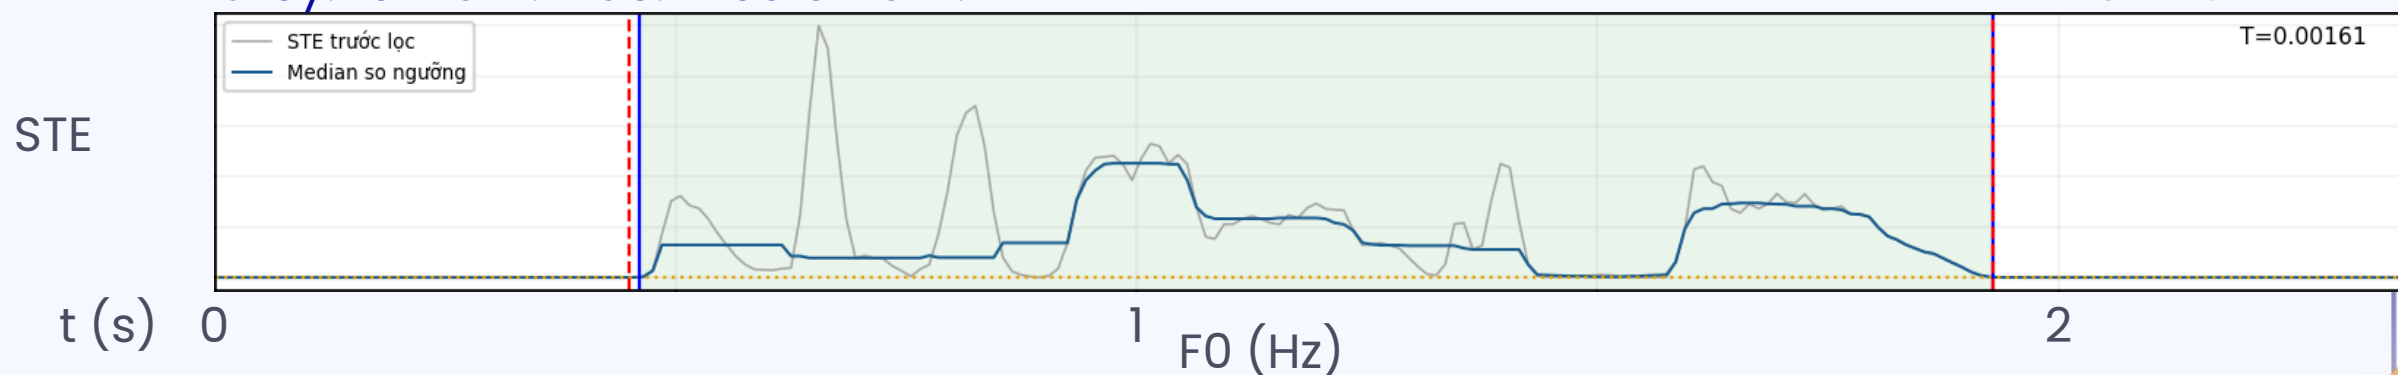

MAE 5 ms

Start 10 ms late. End matches.

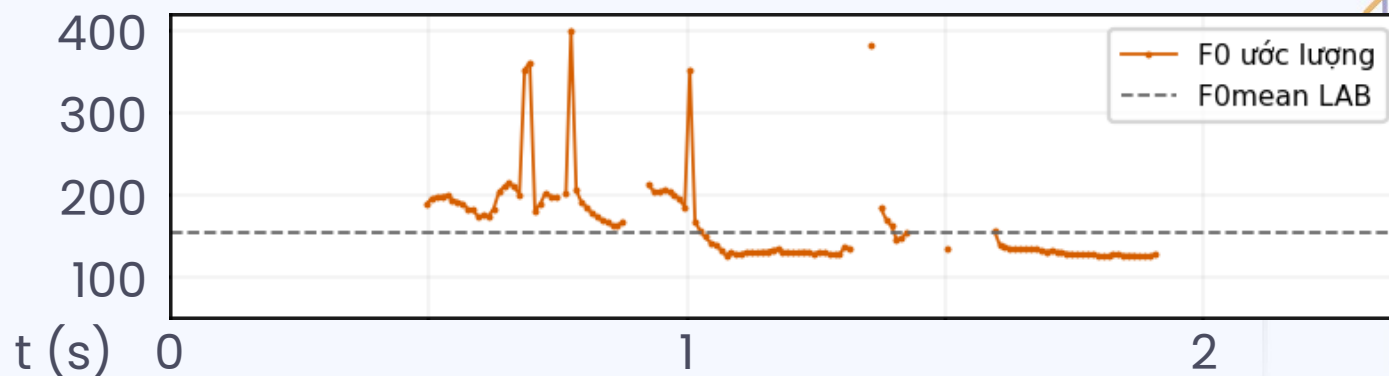

Grey: raw STE. Blue: median STE.

T = 0.0016054242

Possible cause: weak energy near the onset

Extra: 0. Missed: 0.

Histogram

Vương Quốc Trung

TRAIN

TRAIN histograms
128 bins

Try W candidates
Eight values

Score TRAIN boundaries
Errors, then MAE

Selected $W = 30$. Smooth over 3 bins.

TEST

TEST histogram
Normalized STE

First two peaks
Adaptive threshold

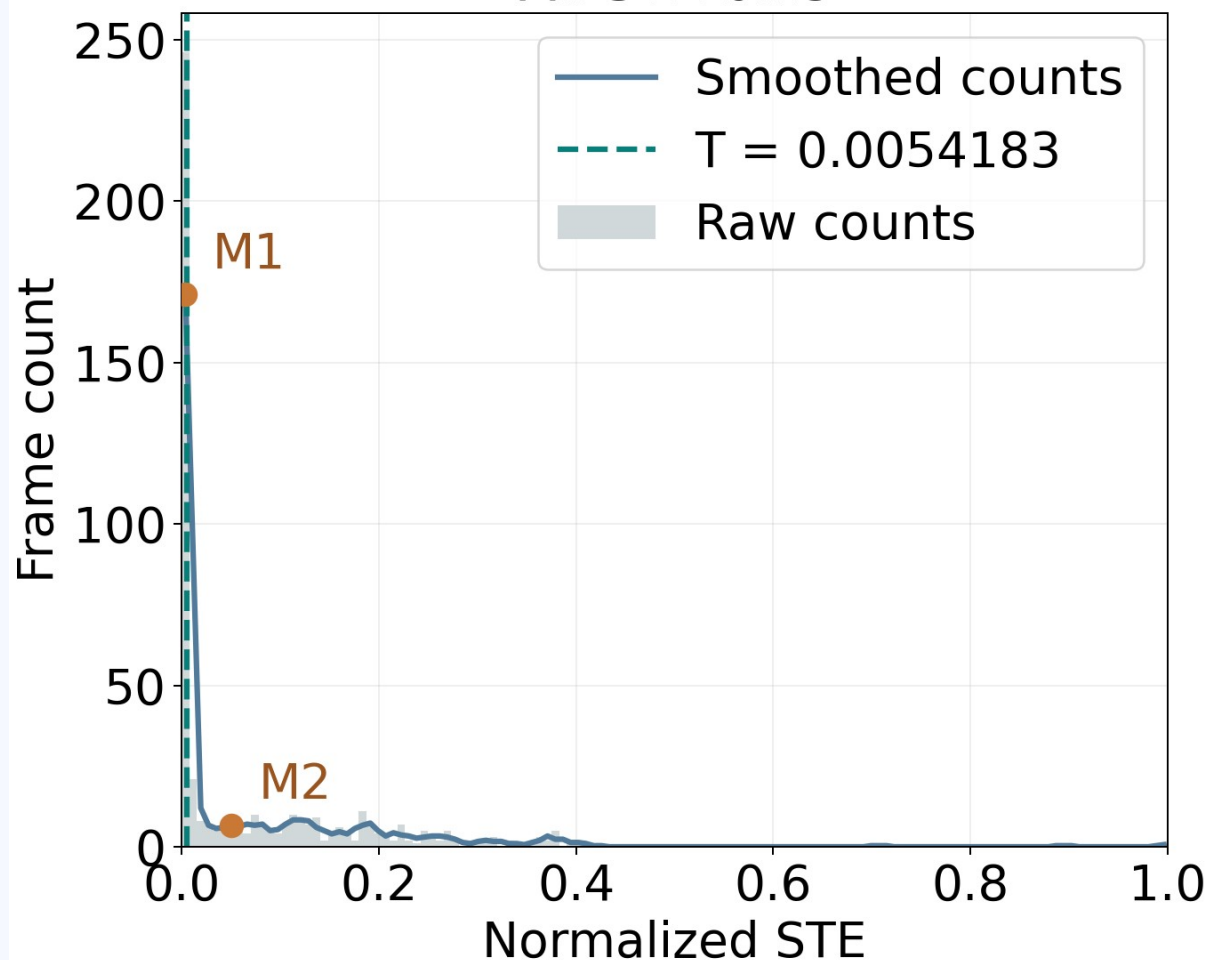

Classify and merge
Silence under 200 ms

Histogram: selected peaks and threshold

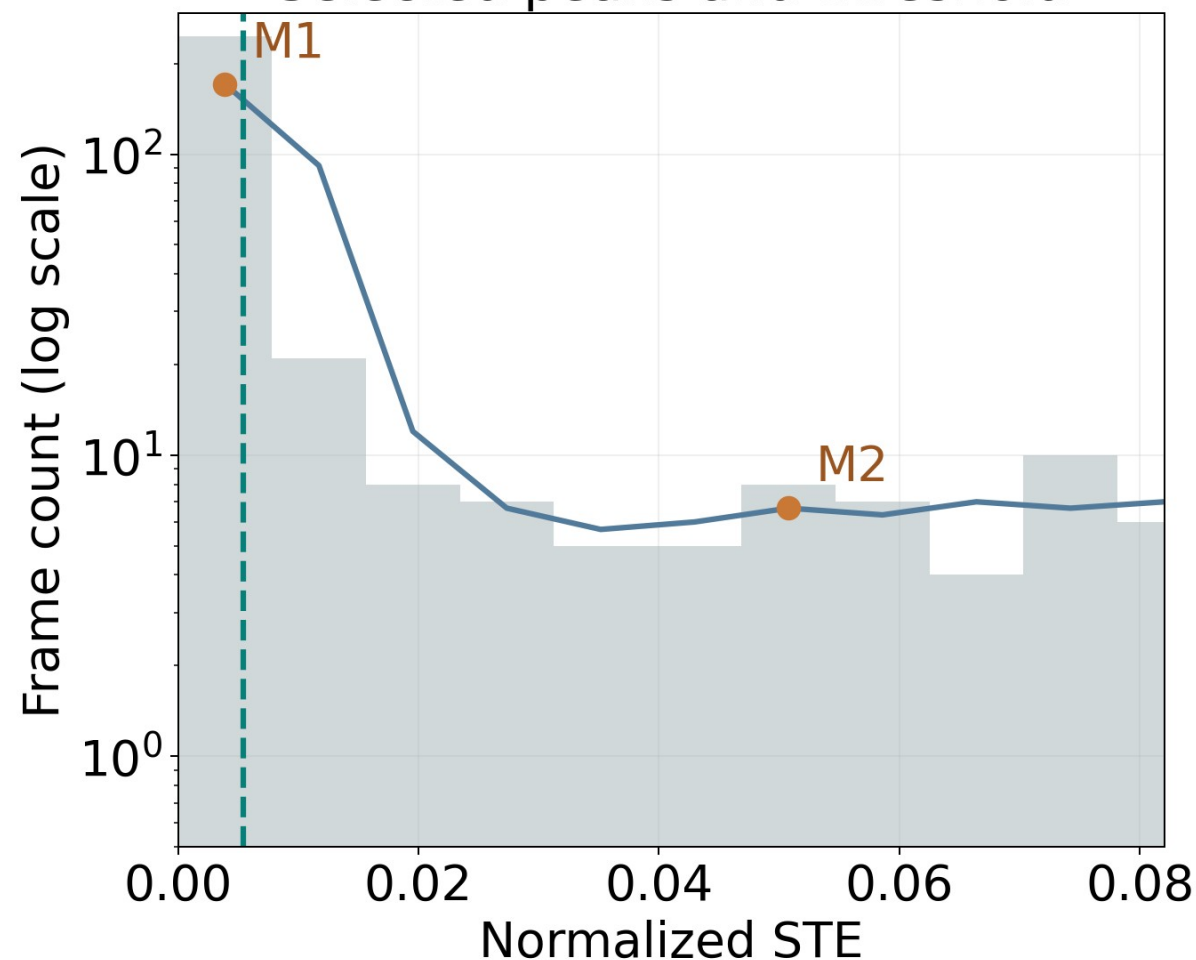

phone_F2. W = 30 from TRAIN.

phone_F2: 128 bins, smoothing 3, W = 30

All STE bins

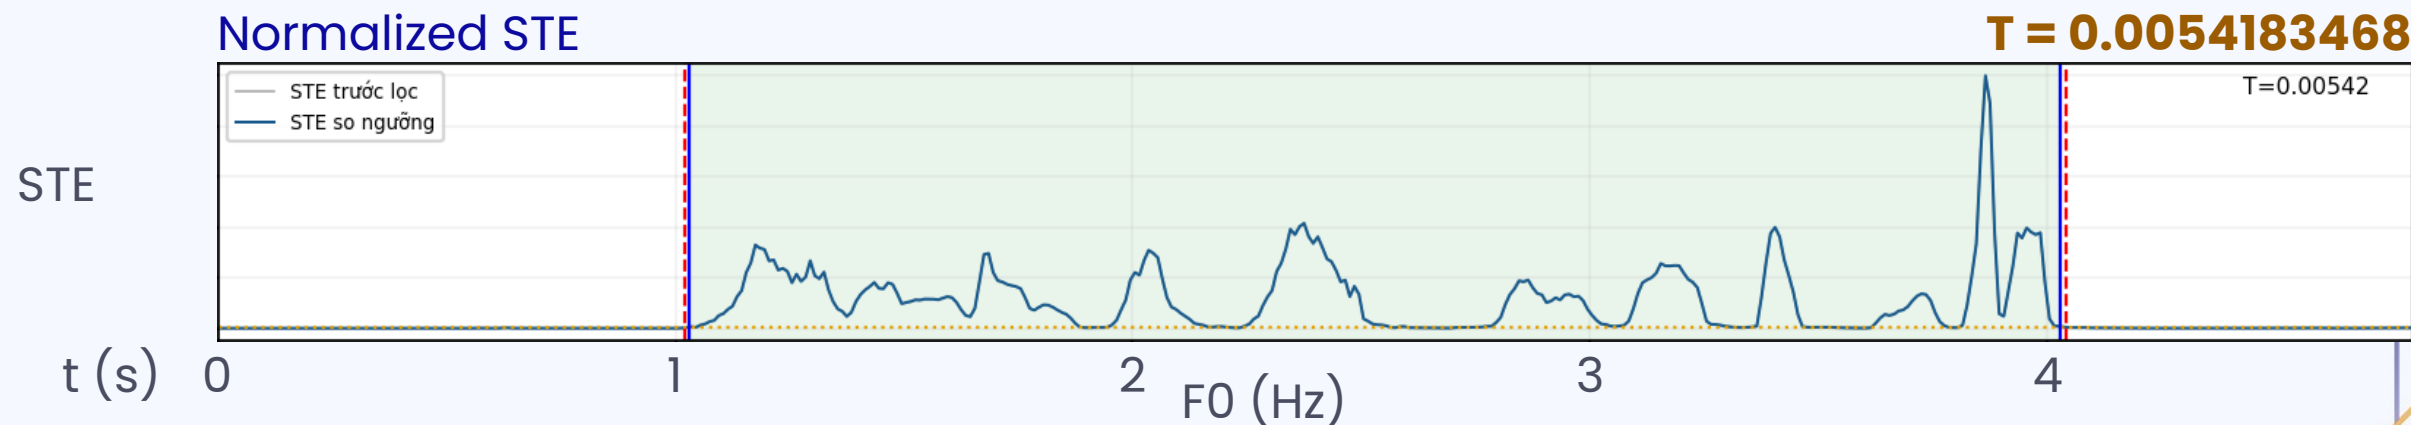

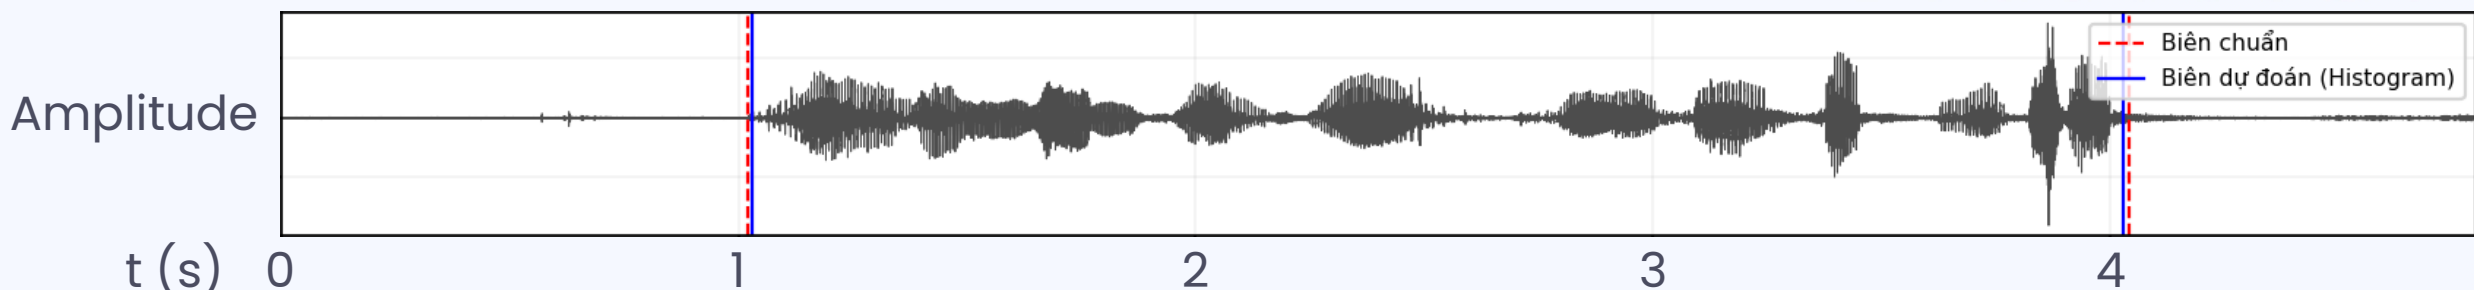

Selected peaks and threshold

Histogram: phone_F2

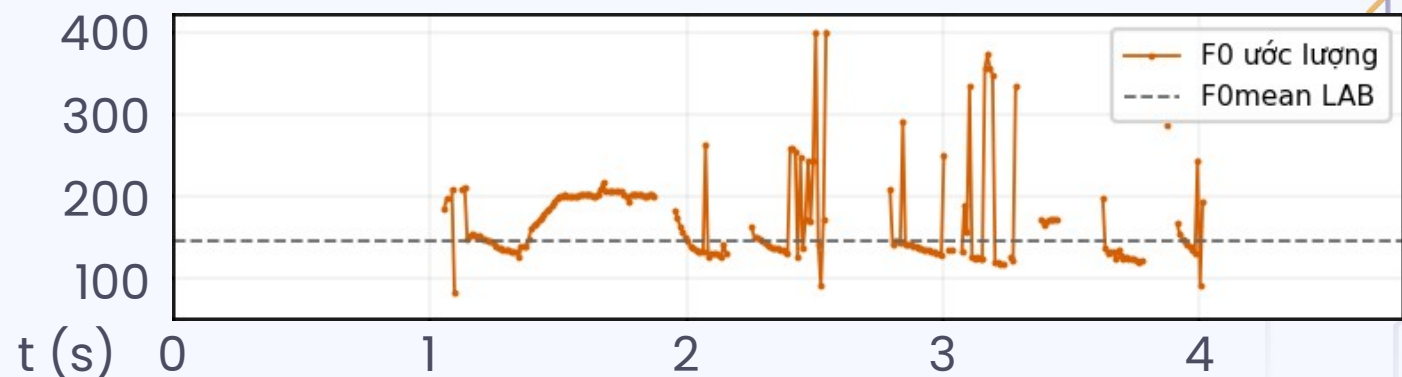

MAE 10 ms

Start 10 ms late. End 10 ms early.

Possible cause: weak energy near the boundaries

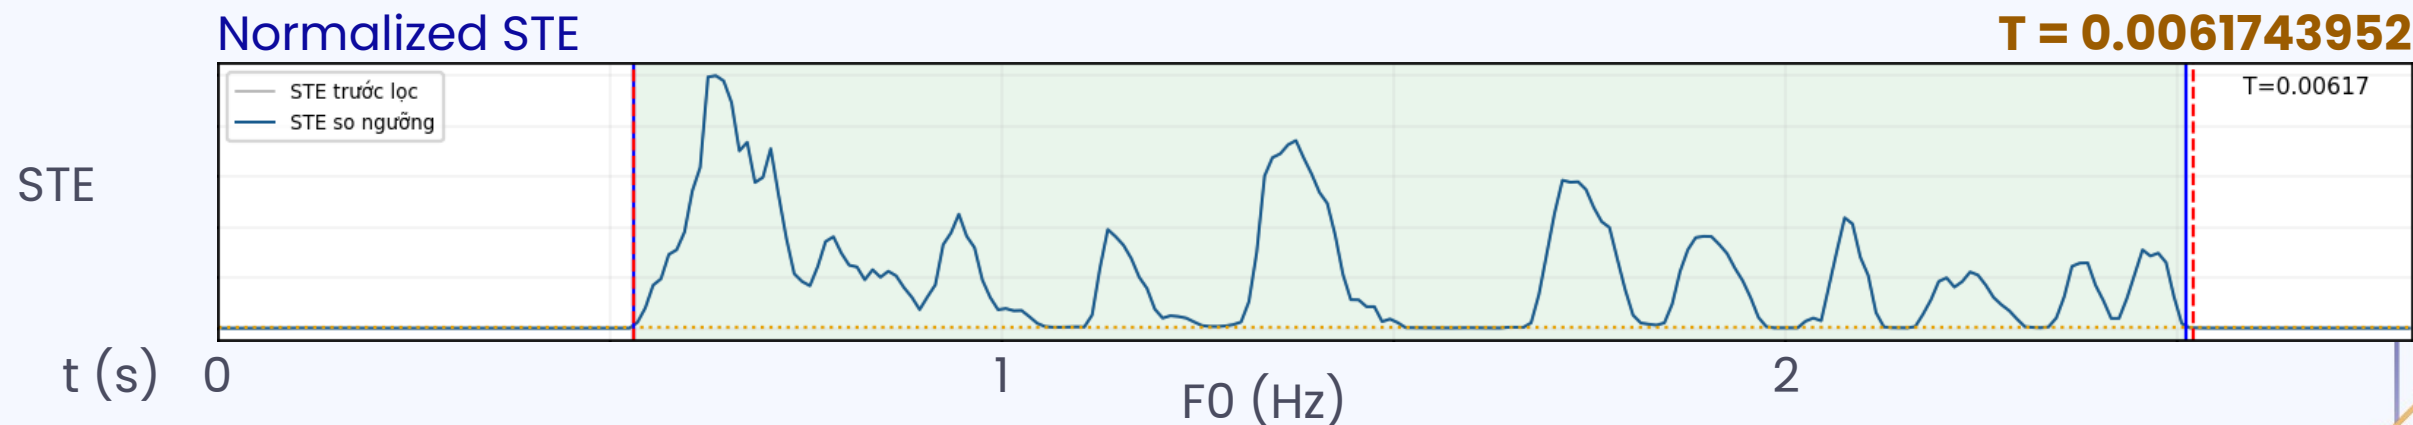

Extra: 0. Missed: 0.

Histogram: phone_M2

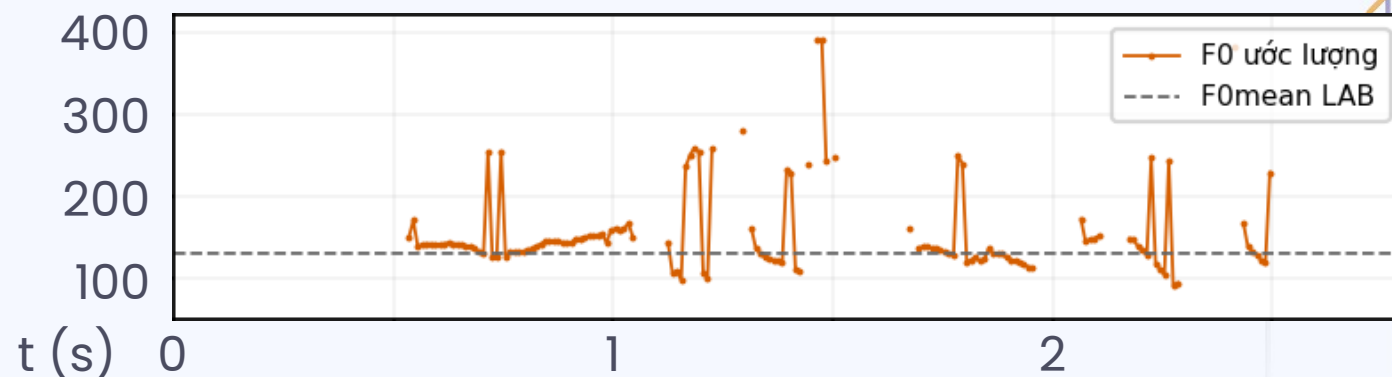

MAE 5 ms

Start matches. End 10 ms early.

Possible cause: weak energy near the boundaries

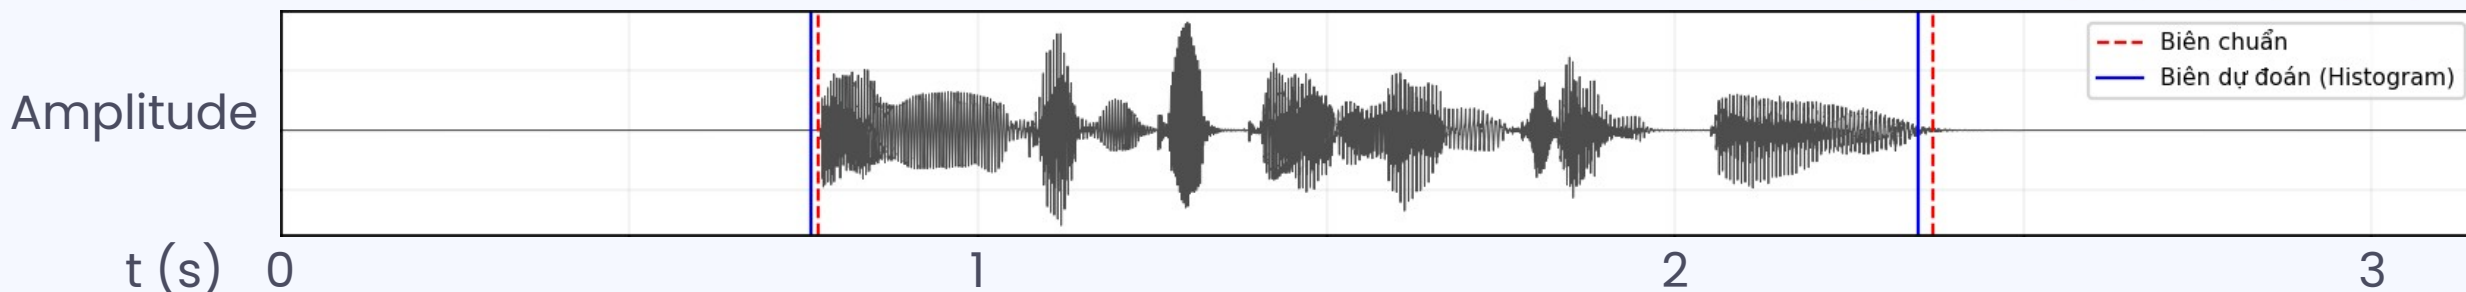

Extra: 0. Missed: 0.

Histogram: studio_F2

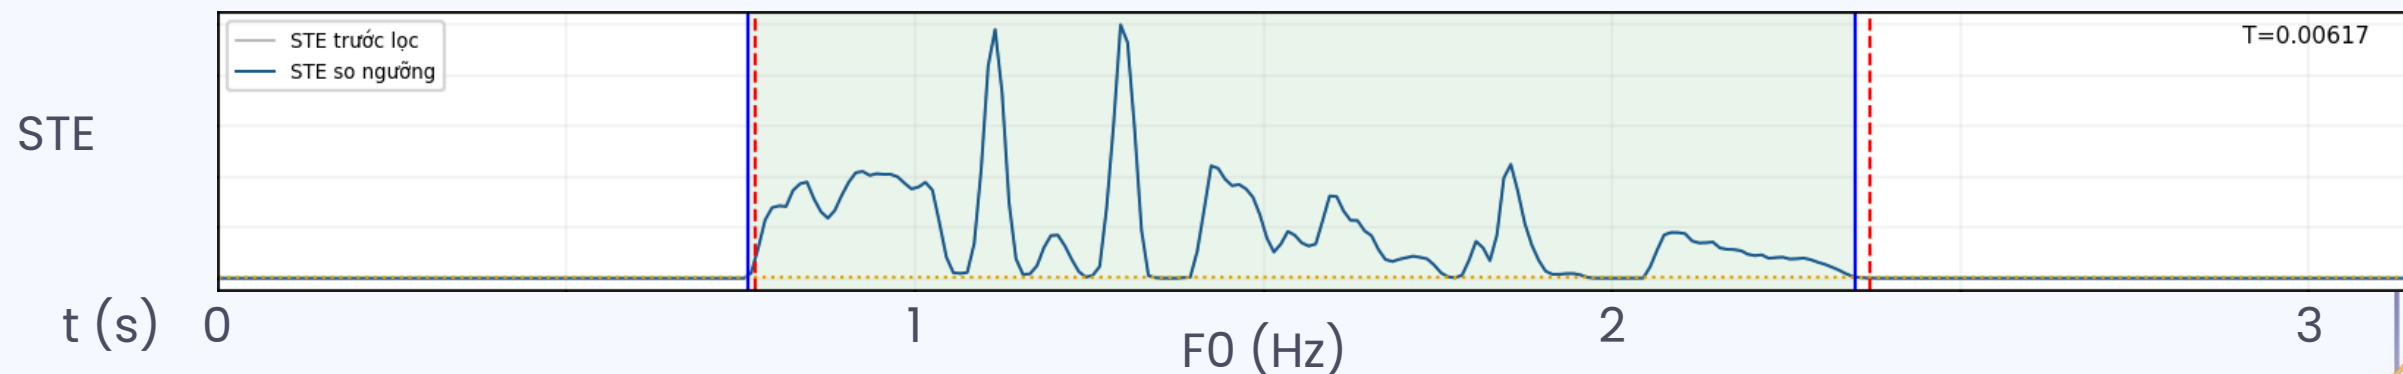

MAE 15 ms

Start 10 ms early. End 20 ms early.

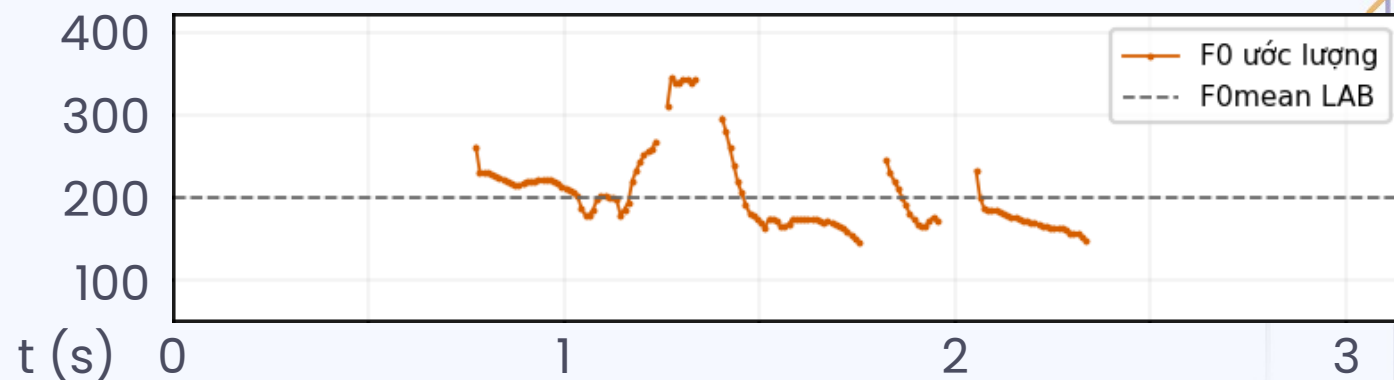

Normalized STE

T = 0.0061743952

Onset window includes speech.
Tail energy falls below T.

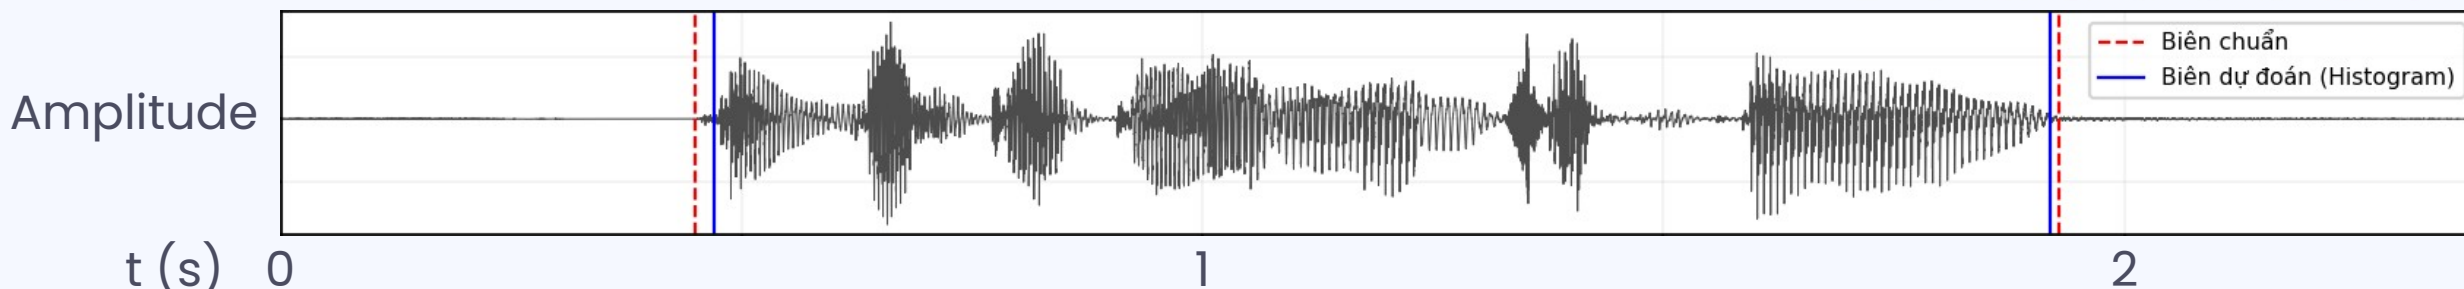

Extra: 0. Missed: 0.

Histogram: studio_M2

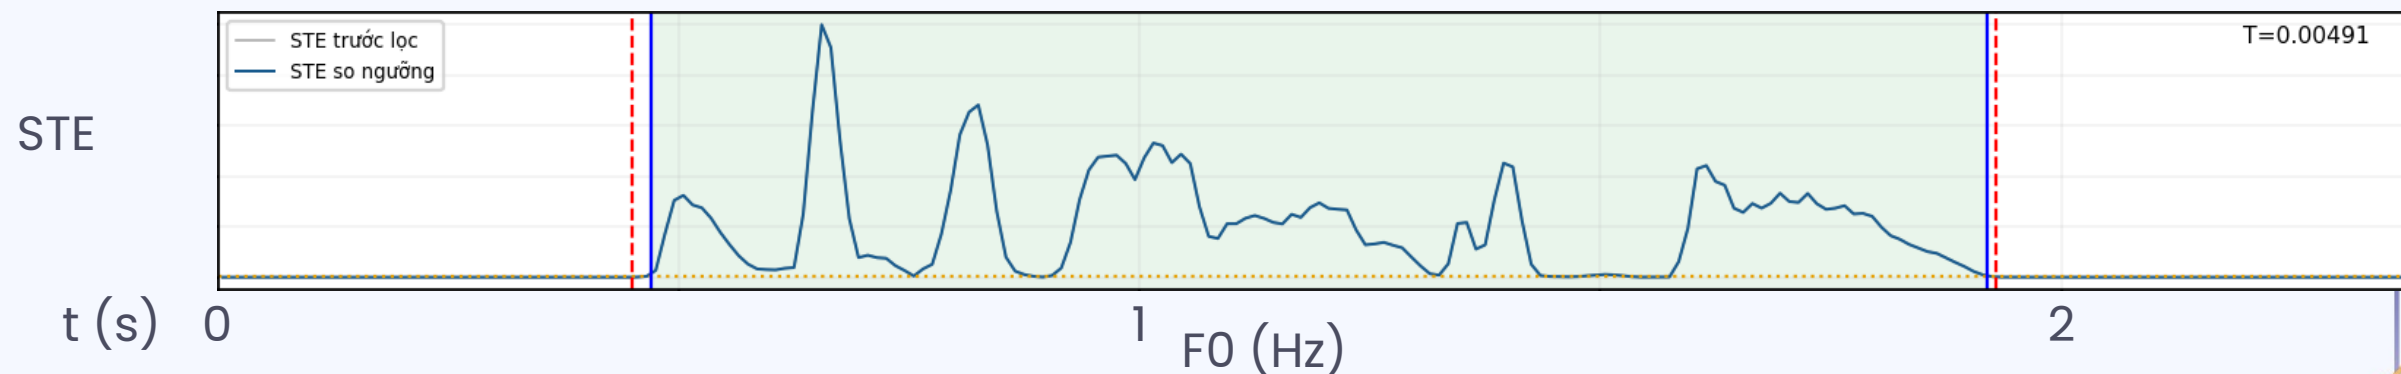

MAE 15 ms

Start 20 ms late. End 10 ms early.

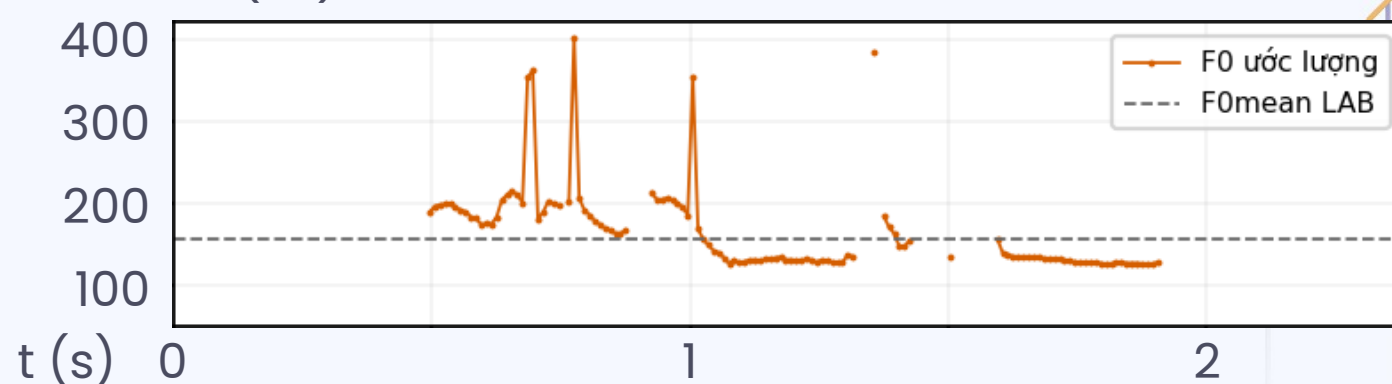

Normalized STE

T = 0.0049143145

Possible cause: weak energy near the boundaries

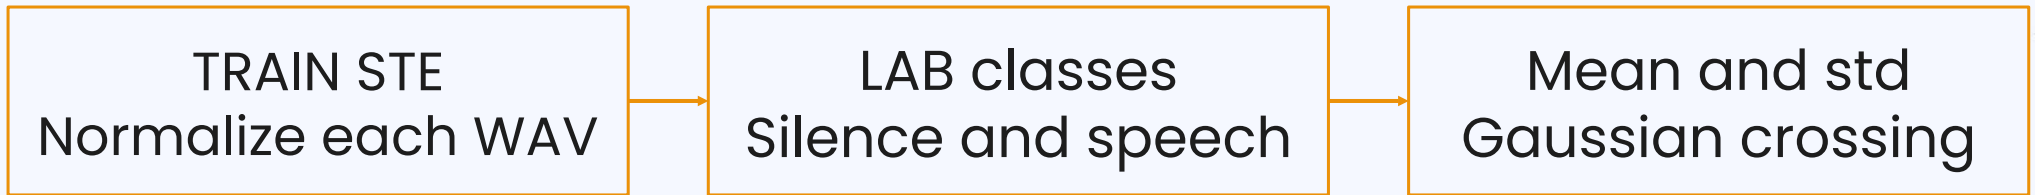

Extra: 0. Missed: 0.

Gaussian Statistics

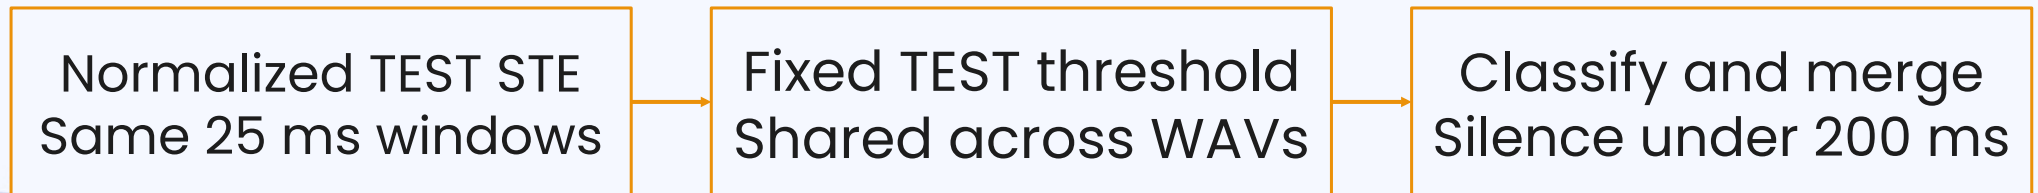

Đình Huỳnh Nguyễn Khang

TRAIN

503 silence, 794 speech. $T = 0.0027634166$.

TEST

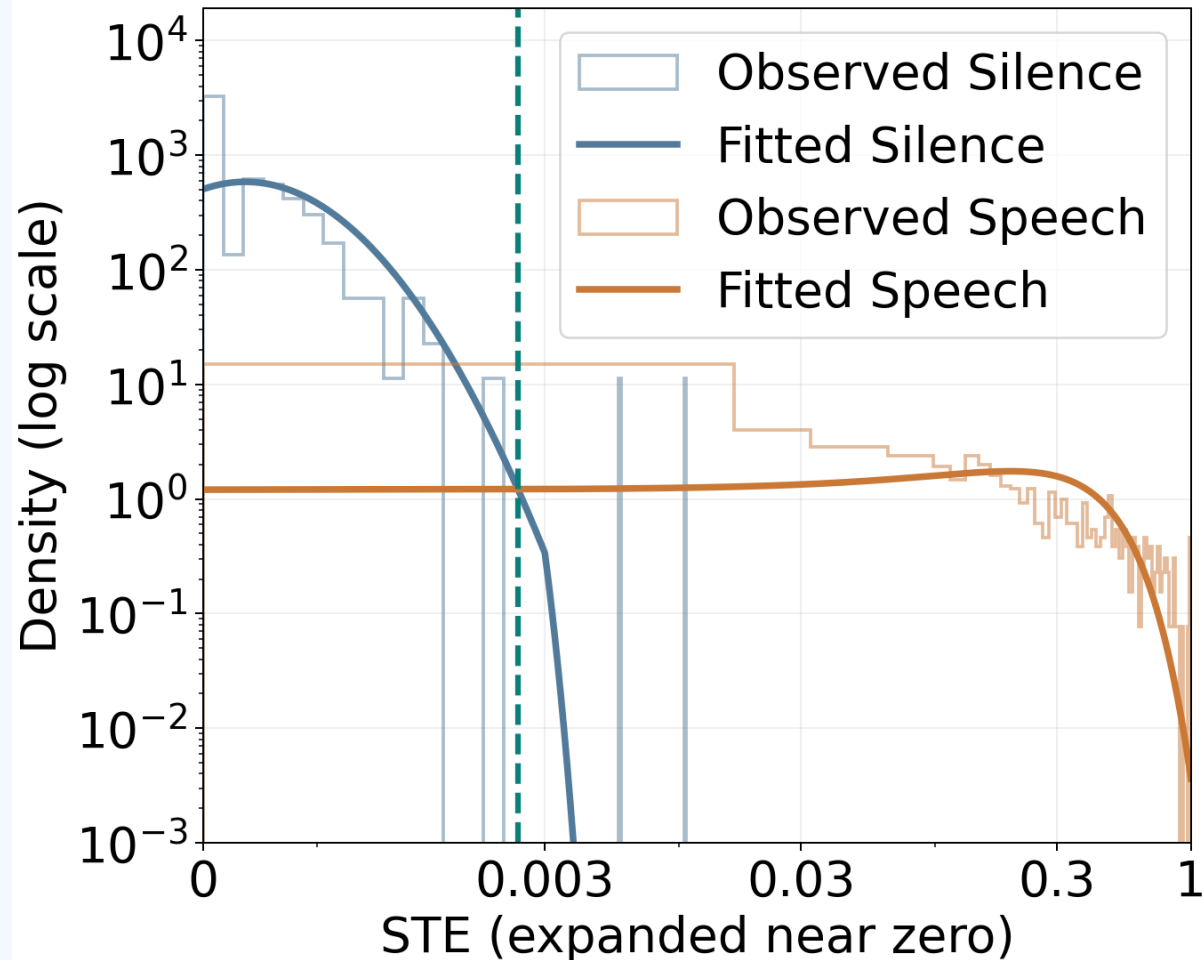

Gaussian: observed data and crossing

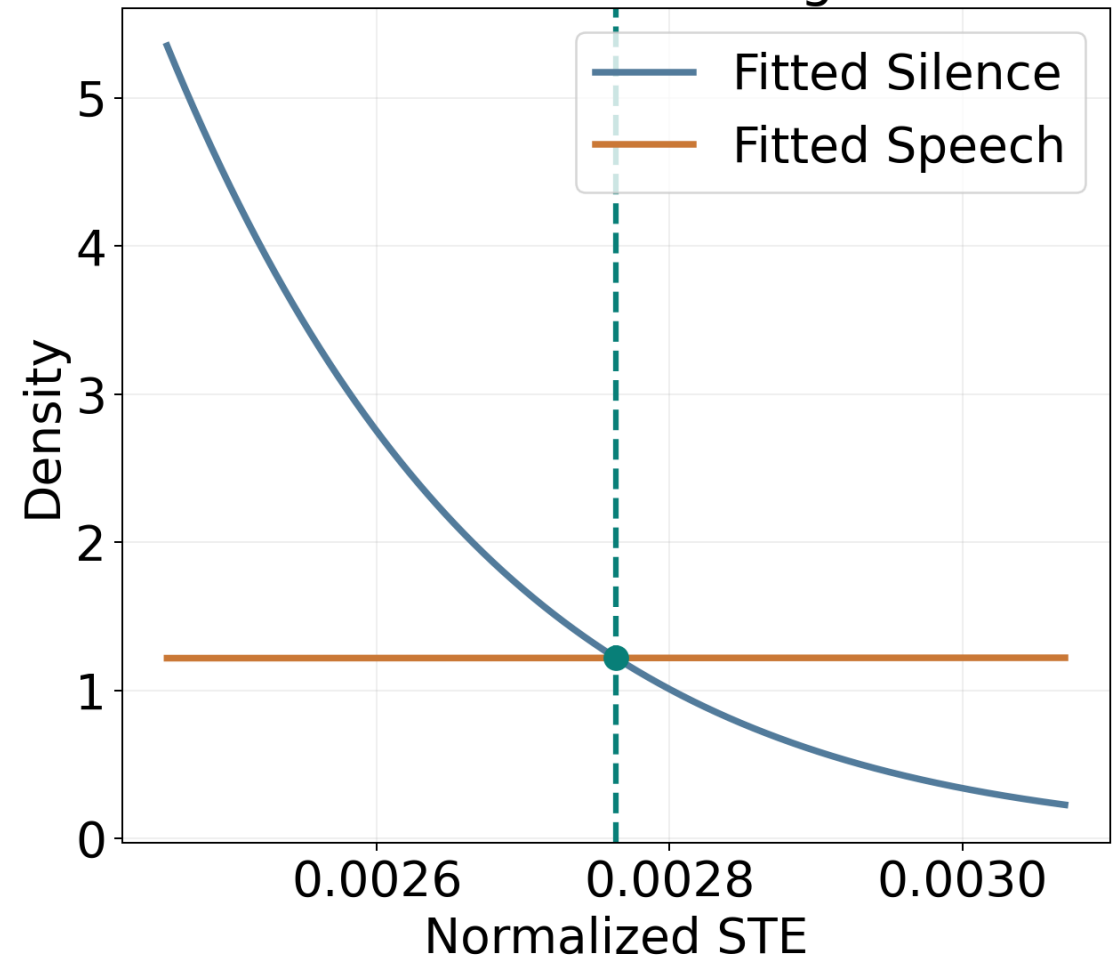

TRAIN estimates. Zoom on the chosen crossing.

Gaussian TRAIN: 503 silence, 794 speech, $T = 0.0027634$

Observed TRAIN and fitted models

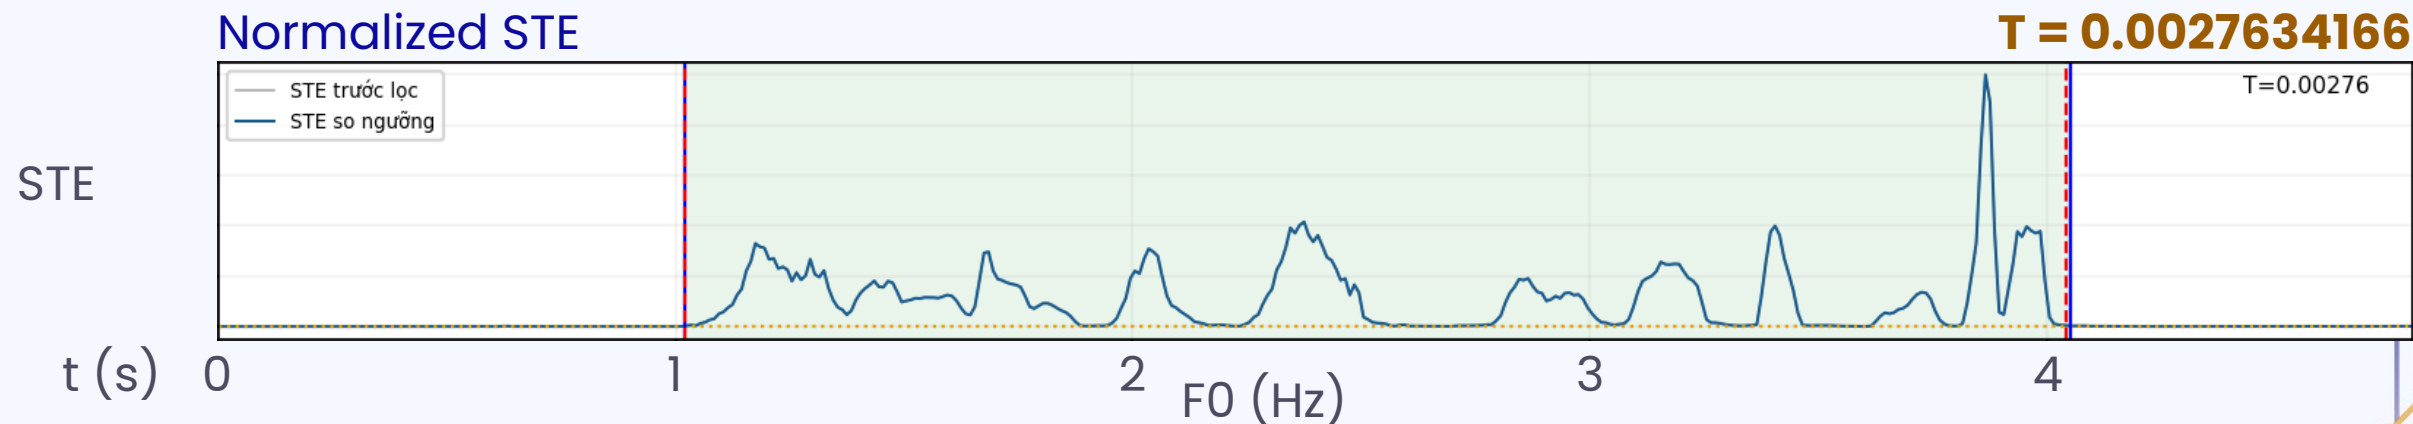

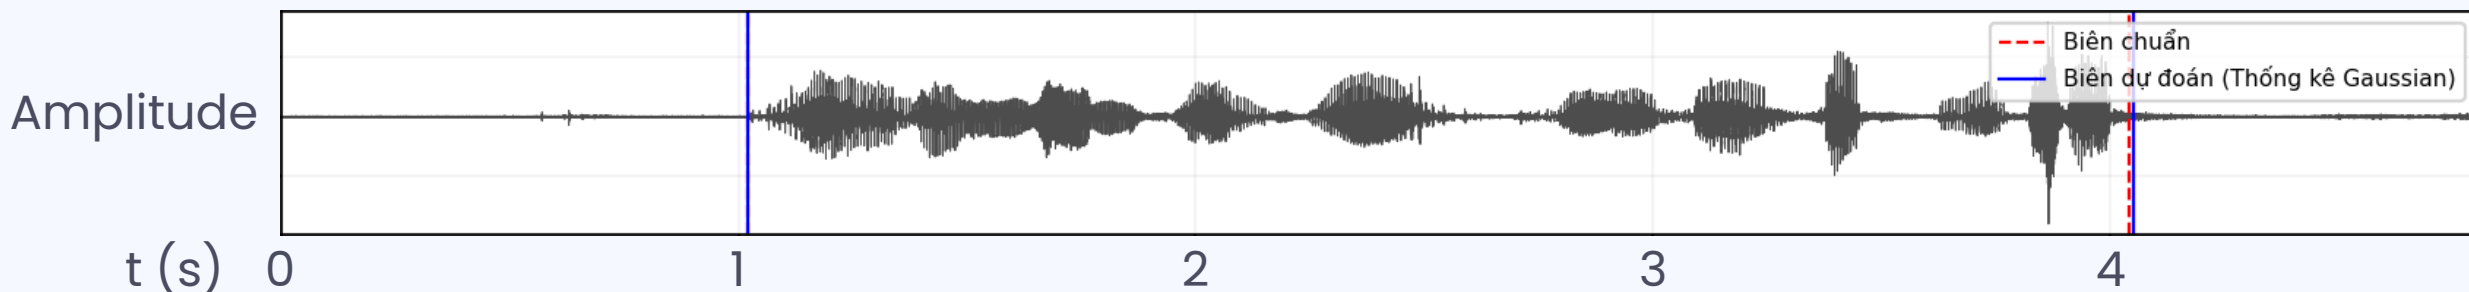

Chosen crossing

Statistics: phone_F2

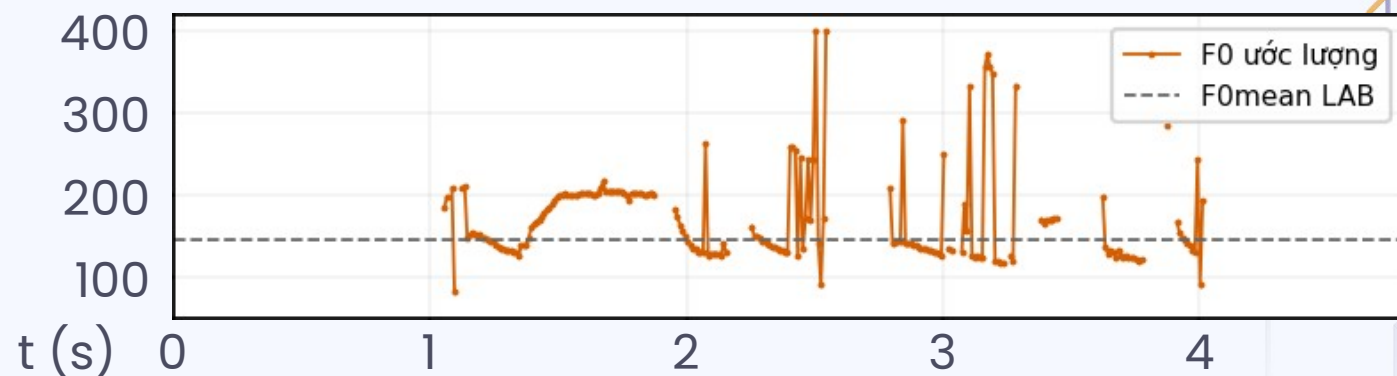

MAE 5 ms

Start matches. End 10 ms late.

Tail STE remains above the shared threshold

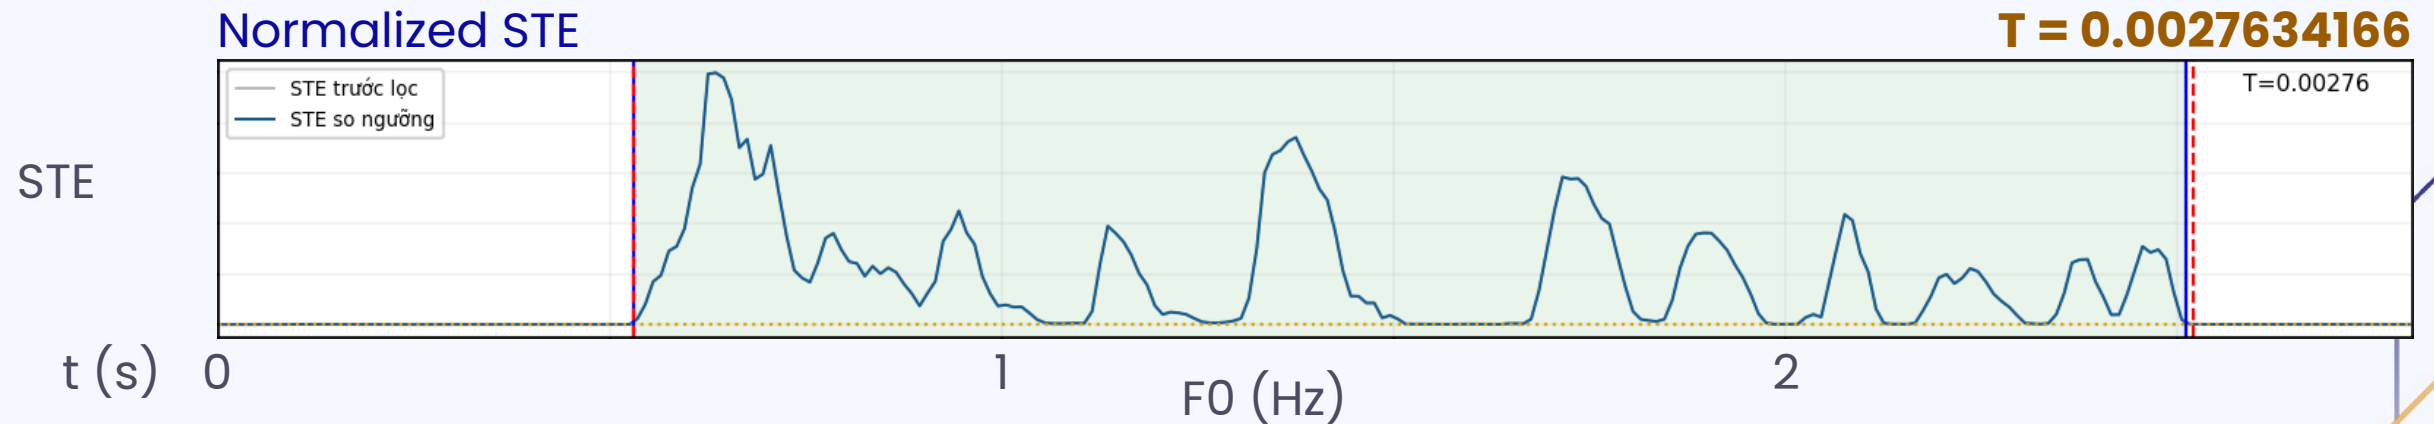

Extra: 0. Missed: 0.

Statistics: phone_M2

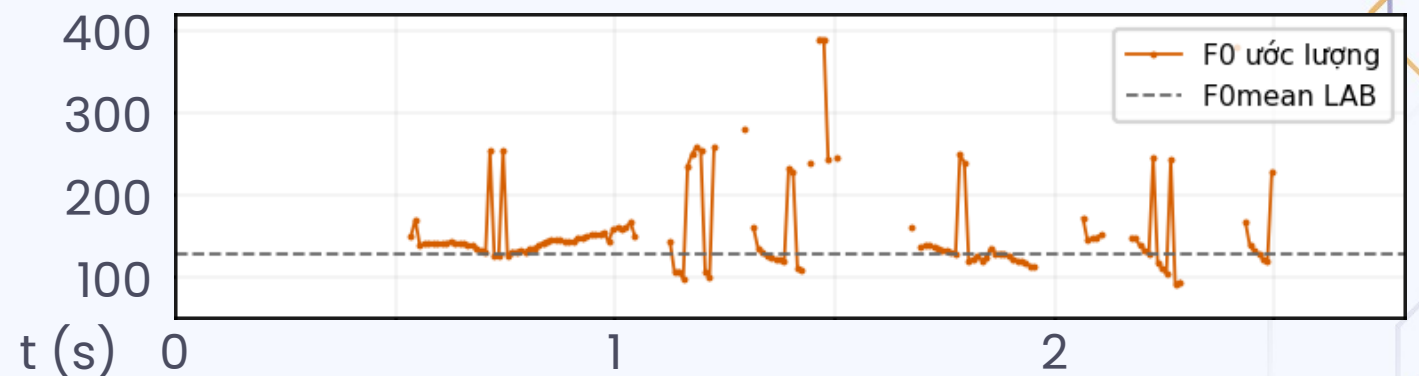

MAE 5 ms

Start matches. End 10 ms early.

Possible cause: weak energy near the boundaries

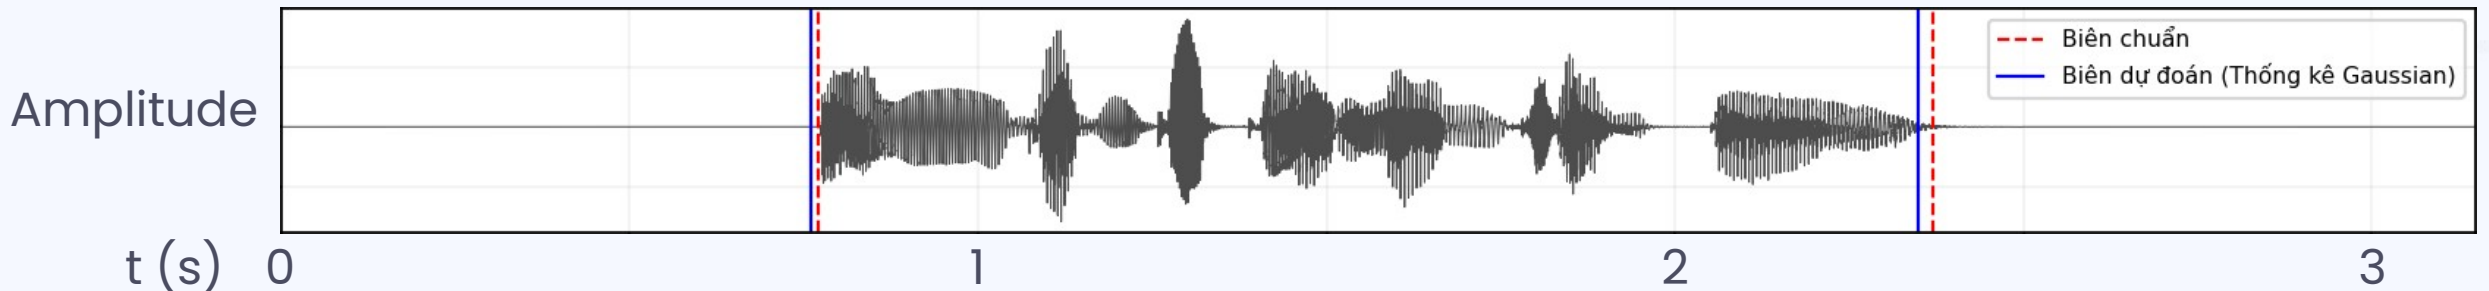

Extra: 0. Missed: 0.

Statistics: studio_F2

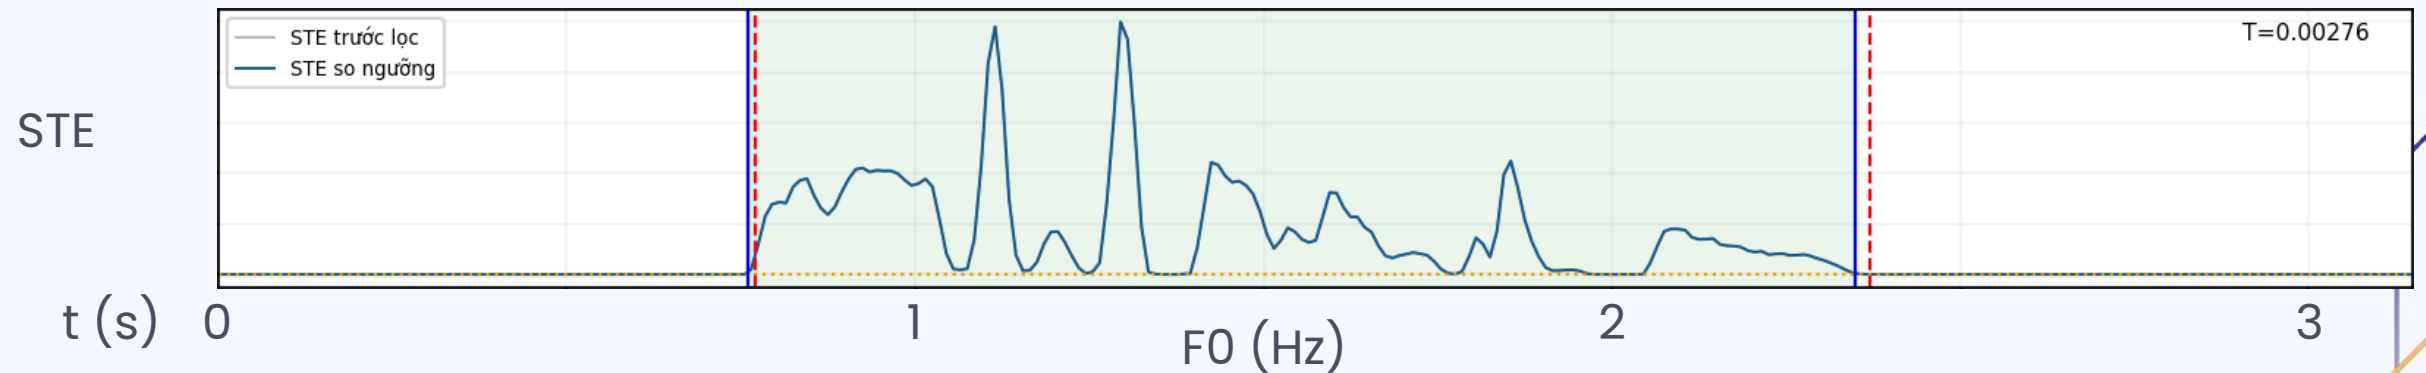

MAE 15 ms

Start 10 ms early. End 20 ms early.

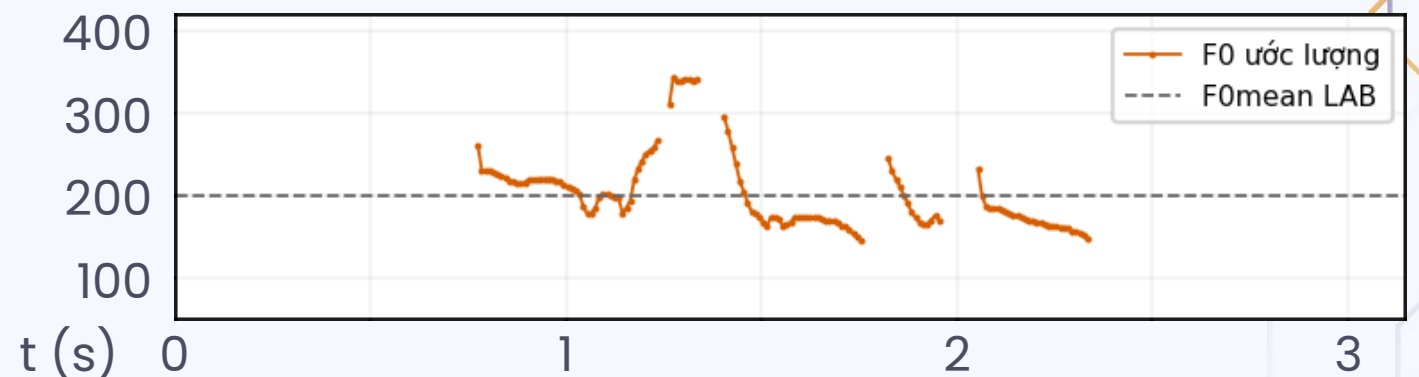

Normalized STE

T = 0.0027634166

Onset window includes speech.
Tail energy falls below T.

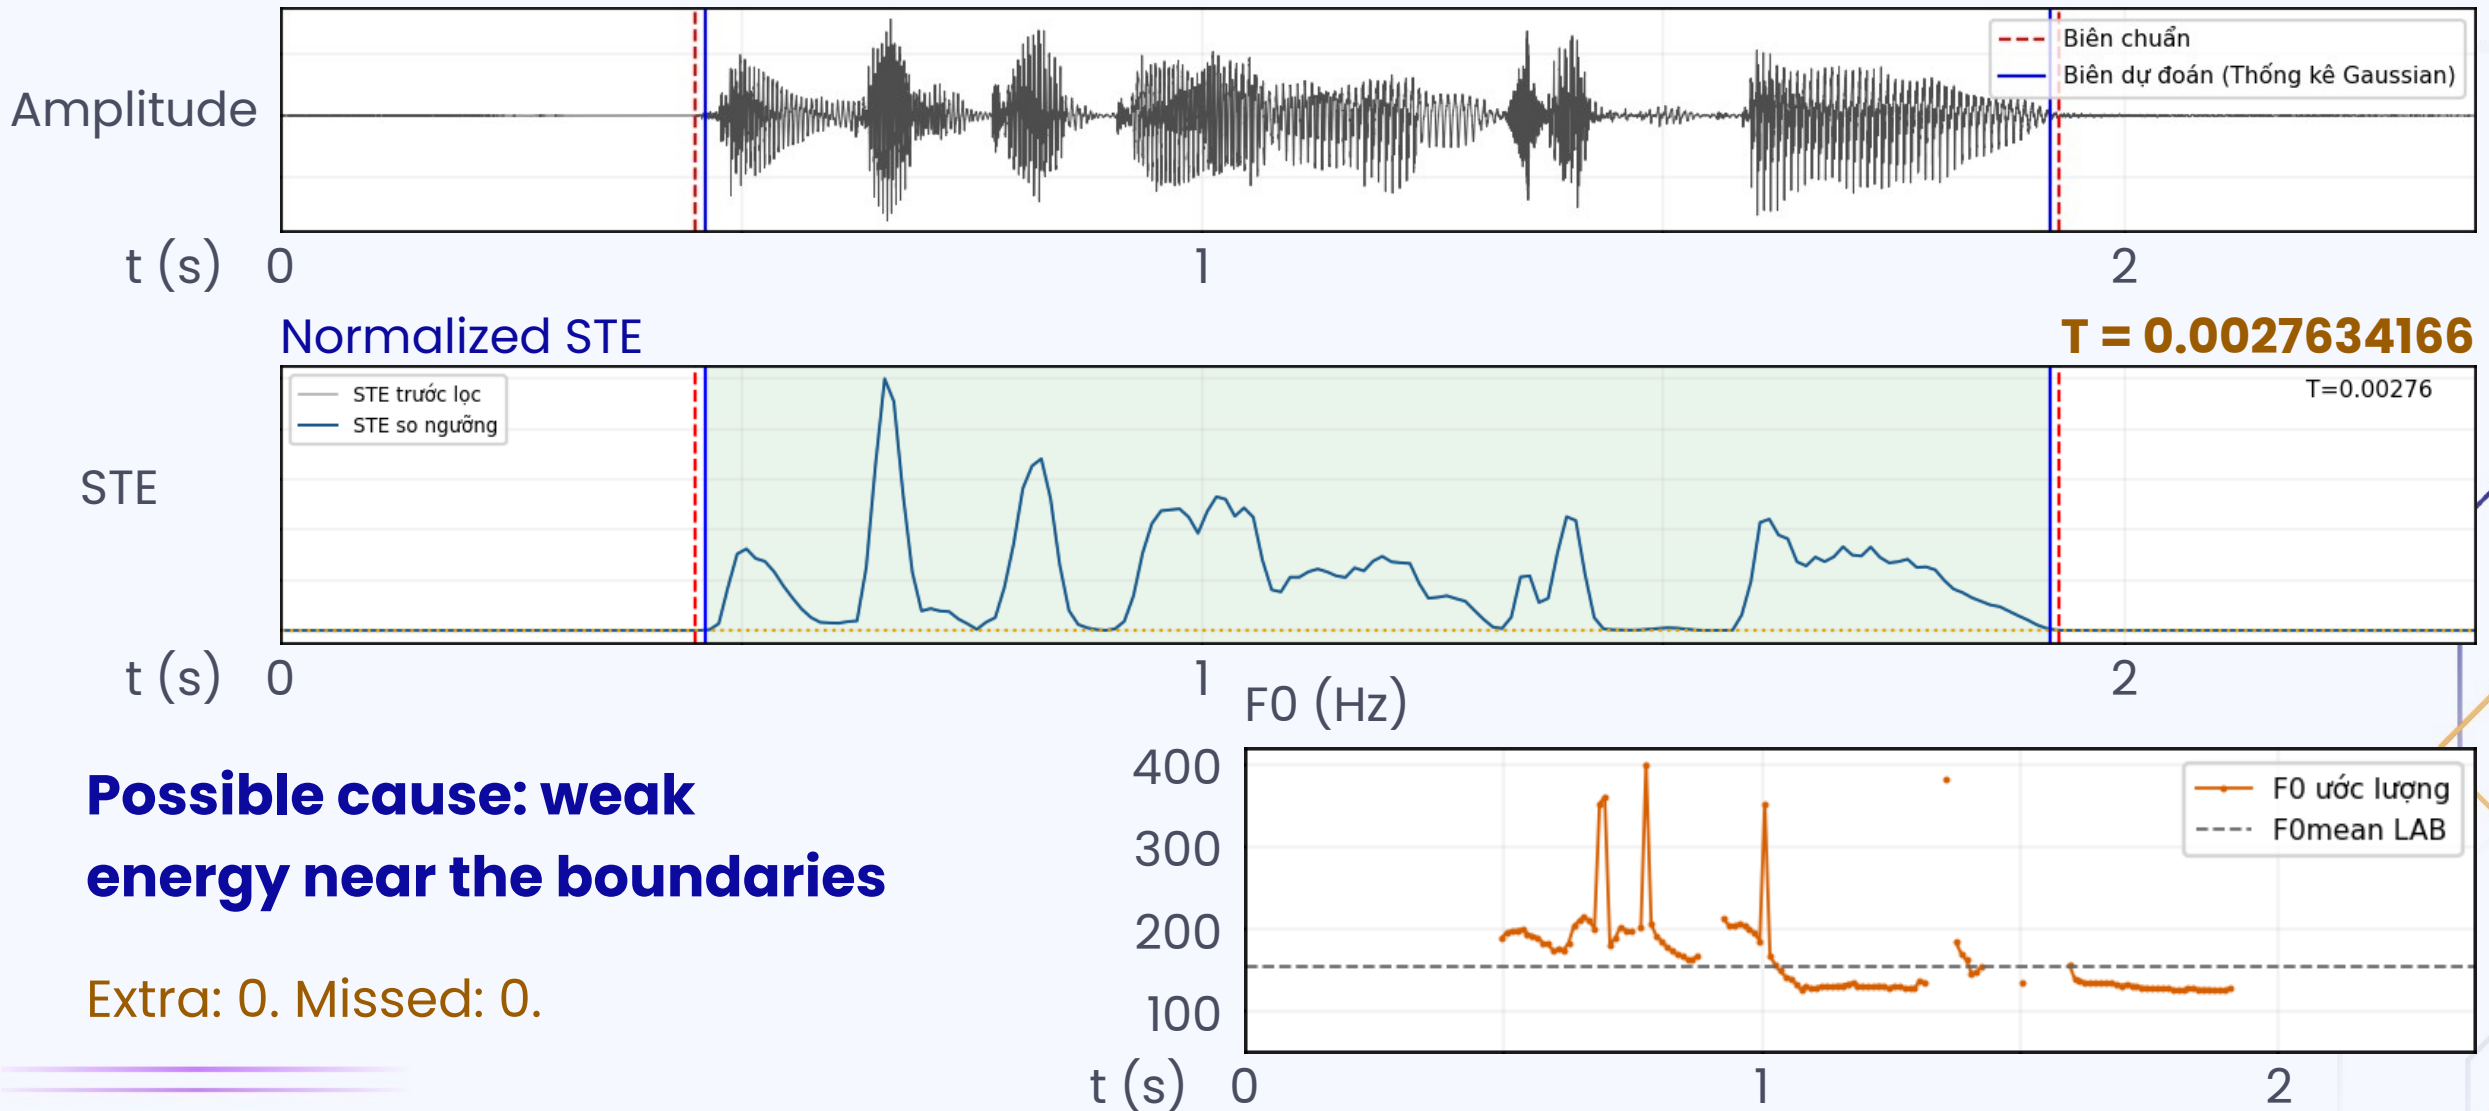

Extra: 0. Missed: 0.

Statistics: studio_M2

MAE 10 ms

Start 10 ms late. End 10 ms early.

Possible cause: weak energy near the boundaries

Extra: 0. Missed: 0.

Statistics has the lowest mean TEST MAE (ms)

TEST file	Binary	Histogram	Statistics
phone_F2	30	10	5
phone_M2	0	5	5
studio_F2	10	15	15
studio_M2	5	15	10
Mean	11.25	11.25	8.75

Thank you
